Port Harcourt, Rivers, Nigeria.

SKILLS

- Solidity
- Python
- React
- MongoDB
- TypeScript
- Foundry
- Hardhat
- JavaScript
- Ethers.js
- Next.js
- Node.js
- EVM

HOBBIES

- Chess
- Gym

LANGUAGES

- English (Fluent)
- German (Basic A1)

PROFILE

Full Stack & Blockchain Developer with expertise in both front-end and back-end technologies. Skilled in designing, testing, and deploying smart contracts across blockchain networks. Proven track record in optimizing application performance and delivering high-quality, production-ready projects. Proficient in a diverse tech stack including Solidity, Rust, Hardhat, Foundry, Web3.js, Ethers.js, and Next.js. Highly adaptable and quick to learn new technologies, consistently demonstrating the ability to integrate emerging tools and frameworks to drive innovation and continuous professional growth.

WORK EXPERIENCE

BriTech Labs

2024 – Present

Full-Stack Blockchain Developer

- Developed, tested and deployed secure smart contract for EVM chains.
- Designed and implemented upgradeable smart contracts using proxy patterns.
- Built full-stack applications using React, Node.js, and MongoDB
- Designed REST APIs for frontend-backend communication
- Optimized application performance and state management
- Implemented secure authentication and data handling.
- Wrote technical documentation for smart contract architecture and usage.

Blockchain Developer

2023 – Present

Solo Projects

- Built and deployed decentralized applications (dApps) with full-stack architecture
- Designed REST APIs for frontend-backend communication
- Implemented ERC20, ERC721, and ERC4626 smart contracts using OpenZeppelin
- Optimized application performance and ensured secure data handling

Oasis Protocol Foundation

2024 – Present

Developer Brand Ambassador

- Developed documentation for developers to build on privacy chain.
- Created step-by-step technical guides for deploying confidential smart contracts.
- Tested and validated cross-chain interoperability mechanisms.
- Hosted technical workshops, Twitter Spaces, and AMAs to educate Web3 developers.

Solo Projects

Blockchain Developer

BriVault (ERC4626 Vault System)

- <https://bri-vault-full-stack-wwid.vercel.app/>
- Built a tokenized vault system with deposit and reward distribution logic
- Implemented secure smart contract architecture for asset management

Token Presale dApp

- <https://starter-pre-sale-dapp.vercel.app/>
- Developed a full-stack presale platform with smart contract integration
- Built responsive frontend with React and integrated Web3 wallet interactions.

EDUCATION

Alx Software Engineering

September 2022 - September 2023

Software Engineering

Bachelor of Mechanical Engineering

September 2013 - November 2018

Mechanical Engineering | University of Port Harcourt
